

LC ©**RELATIONS WITH EDUCATION RESEARCH AGENCIES**

The Superintendent is authorized to cooperate with colleges, universities, and other recognized research agencies in promoting potentially useful research. Because of the number of requests for studies in schools, it may be necessary to limit the number and establish guidelines for the approval of studies.

Decisions in connection with research involving students, teachers, or other employees will be influenced by the following factors:

- The objectives of the research should be clearly stated and the design should produce valid and reliable results that will then be made available to the School.
- The research should be expected to contribute to the improvement of education or the general welfare of students.
- Data derived from school records, interviews, or questionnaires that have potential for invasion of the privacy of students or their families must have advance written authorization of parents or guardians even though the collecting and reporting of data are to be conducted under conditions of anonymity.
- Research proposals should be of sufficient scope and depth to justify the time and effort.
- In general, instructional activities will not be interrupted unless there is a clear significance for the educational program of the schools.
- Projects involving student researchers must have prior written approval by a faculty member of the institution in which the student is enrolled. This faculty member must have direct responsibility related to the student's research.

Adopted: date of manual adoption

LD ©**RELATIONS WITH COLLEGES AND UNIVERSITIES**

In order for staff members and students to benefit from the resources provided by colleges and universities, the Superintendent shall seek out and utilize the services of college and university faculty members or programs when they are compatible with the needs of the School.

Research involving student time shall be of benefit to the School.
